

$\varphi = 0^\circ$, raw

sample points on pixel centres

$$E/E_{\times 4} = 1.01$$

$\varphi = 40^\circ$, raw

one bilinear warp: the cue

$$E/E_{\times 4} = 0.90$$

$\varphi = 40^\circ$, supersample $\times 4$

the control the arms use

$$E/E_{\times 4} \equiv 1$$
